## PEANUT GROWING FOR PROFIT

Peanuts are at present an important money crop in no less than 12 of the Southern States, especially in those regions infested by the cotton boll weevil. The peanut is a native of the Tropics and was introduced into the United States during the earlier days of colonization but did not become of commercial importance until about 1870. From that time until 1897 its importance as a farm crop was relatively small, but the production and uses of peanuts have increased enormously during the past 20 years.

## BUCHANAN'S LESPEDEZA [JAPAN CLOVER]

**LESPEDEZA (JAPAN CLOVER)** Restores fertility to soil - grows anywhere needs no inoculation - is not a pest - grows with little or no preparation of soil stops erosion - makes excellent hay - easily cured and is the best nitrogen gatherer known for poor or worn soils - sow 20 to 25 lbs. to the acre.

Our Lespedeza is recleaned - free of Johnson Grass, Nut Grass and Coco Grass, - it is the most valuable clover or grass sent by the "Creator of All Things" to improve worn Cotton lands. Lespedeza (Japan Clover) weighs 25 lbs to the bushel.
